

Internship Position

The Balmoral Group is seeking motivated students for an immediately available Engineering Internship position to support our Transportation and Hydrologic Engineers at our Winter Park, Florida office. Interns will gain real world experience as they develop professional working knowledge of industry methods, procedures and standards while working under a Professional Engineer.

Intern duties may consist of data entry, performing engineering calculations, preparing quantity calculations and cost estimates, utilizing computer programs to solve engineering problems, researching previous project plans and reports, and using CAD software for production of plans and exhibits.

- ✓ Paid Experience
- ✓ Technical Training
- ✓ Expert Mentorship
- ✓ Accommodates School Schedule

What to Expect

Interns will work alongside our professional staff to gain hands-on experience in a cooperative work environment. Interns can expect to learn technical skills in a wide area of expertise as well as gain a valuable skillset of transferable skills like problem-solving, innovative thinking, and formulation of adaptive solutions.

Interns will receive professional development and mentoring from our Senior Managers, Directors and Partners. In addition, interns will have opportunities to attend professional networking events for a well-rounded experience. After completion of the internship, our interns will have gained valuable experience and achieved clarity on their career path, setting them up to be a competitive applicant after graduation.

Work Environment

The Balmoral Group is headquartered in downtown Winter Park, Florida with additional offices in Tallahassee, Seattle, and Sydney & Queensland, Australia. The Balmoral Group combines engineering design expertise with economics, environmental analysis and GIS capabilities. Our engineering staff has an excellent reputation for providing high-quality consulting services in the design of urban and rural arterials and freeways/expressways.

The Balmoral Group has a personable work environment that provides interns with multi-level mentorship to ensure cross-training and allow for robust professional development in a diversity of projects and tasks.
