Amy Bainbridge, M.S. is a Resource Economist and Grant Specialist specialized in funding mechanism identification, policy, and cost-benefit analysis. She has 9 years of experience coordinating grants compliance, conducting performance and financial reporting for clients like the Gulf Consortium, as well as grants identification, coordination, and proposal management support for New Smyrna Beach Utilities and VDOT. She has experience with FEMA BCA requirements through work with King County, Washington (BRIC Grant) and Martin County, Florida (FEMA HMGP). Her team recently helped NSBU procure \$7.5M in funding for a Septic-to-Sewer related project. ABainbridge@balmoralgroup.us

Cortney Cortez, M.A. is a Senior Economist and expert in cost-benefit analysis, econometric modeling, data management. Cortney has 10 years of experience and has provided invaluable support across a multitude of cost-benefit analysis and grant related and funded projects.

Grant Miller, B.A. is an Economic Analyst with a background in business economics and finance. He provides valuable support in data research and collection, literature review, economic analysis, regulatory compliance, graphics development, site visits, subject matter expert consultation, document review and interviews and outreach.

TBG DIFFERENCE
